

Project Report template

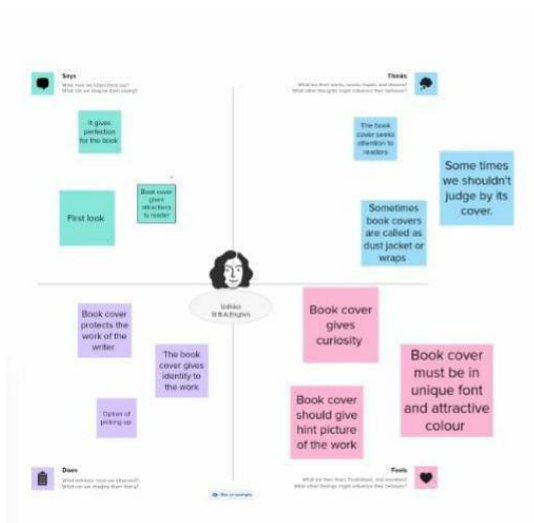

Introduction:

The project aims to enhance the innovation and entrepreneurship skills of students through various projects based learning.

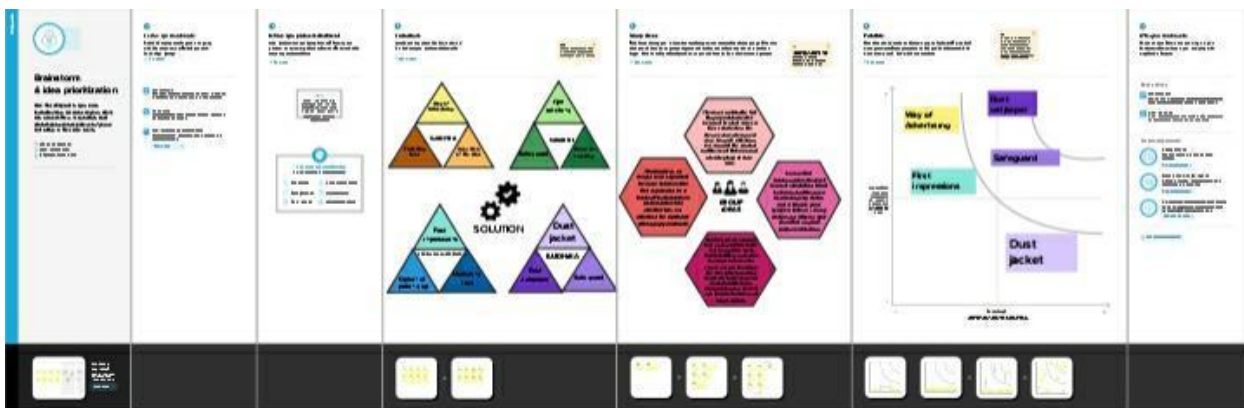

Purpose:

We can achieve technical and professional competencies while working on world challenges and creating innovative solutions.

2) (i) Empathy map:

(ii) Brainstroming map:

3) Results:

4) Advantage:

A well-designed cover can make a book stand out in a crowded marketplace, and can help to establish an author's brand. A book's cover and its content should be inextricably linked. A well-designed cover can communicate the book's content and tone, and can help to attract the right readers.

Disadvantage: Quality: Unless you have design skills and experience, the quality of your book cover may not meet industry standards, which can hurt your book's sales potential. Time-consuming: Designing a book cover can be time-consuming, especially if you don't have prior experience or design skills.

5) Application:

This application is accessible. This helps to create our dream design into real.

6) Conclusion:

Using these applications we are able to get so many features to develop our dream design into many formats.
